Overview

- Almost 2 years of experience in web development.
- Proficiency in HTML, CSS, JavaScript
- Strong proficiency in JavaScript, including DOM manipulation and the JavaScript object model
- Thorough understanding of React.js and its core principles. Experience with popular React.js workflows (such as Redux, HOC)
- Familiarity with RESTful APIs
- Hands-on experience on Java, MySQL, Docker, AWS
- My goal is to work in a professional environment where I can prove my skills and use them for the growth of the company.
- I want to improve myself to become a senior developer about more 2-3 years.
